- Quick Connect Solutions for Your Food Safety Culture

### Introducing the 208 Detect: the First-of-Its-Kind Metal & X-Ray-Detectable Plastic Blow Gun

- ✓ Made from food-grade, detectable plastic
- ✓ Plastic adheres to Reg. (EC) No. 1935/ 2004 & FDA CFR 21.170-199 standards
- ✓ Stainless steel valve with food-grade grease
- ✓ Detectable and food-approved seals
- ✓ High chemical resistance

Made from food-grade, detectable plastic and featuring metal detectable seals and a stainless steel valve, the 208 Detect minimizes the risk of foreign body contamination, product rejections, expensive recalls, and product waste. It can be used for a variety of compressed air applications, including where a blow gun is used in close proximity with food during production: blow-off, air cleaning, drying (e.g., blowing food debris off equipment, conveyors, and drying of utensils); meat and dairy processing; food packaging; and vacuum sealing. The 208 Detect adheres to with Reg. (EC) No 1935/2004 and FDA CFR 21.170-199; and complies with HACCP, IFS and BRC procedures.

### Stainless Steel Hose Reels Designed for Food Safety in F&B Washdown Applications

CEJN hose reels keep the food and beverage production environment clean and sanitized. Using hose reels enables a higher sanitary level as the hoses are rolled back into their cases after use, and thereby, minimizing the risk of having the washdown gun touch the floor. Workplace safety is also increased by preventing tripping hazards when hoses aren't lying on the floor.

- ✓ Available with food-approved PVC hose or rubber hose
- ✓ High-performing stainless steel alloys (AISI304 or AISI316)
- ✓ Durable design
- ✓ Easy to clean
- ✓ Install on floors or ceilings

Your choice for safety  
& sustainable solutions

## Safety Equipment Solutions

- Quick Connect Solutions for Your Food Safety Culture

**CEJN offers a wide range of high-performance solutions to make daily work in the F&B industry more efficient, and to maintain a high level of food safety in the production process. Through careful tests and analyses, our products reduce energy losses in customers' systems without impacting the performance. By minimizing energy losses, impact on the environment will be saved.**

### Washdown Gun

CEJN Washdown guns is the ideal accessory for CEJN's stainless steel hose reels. Washdown guns are suitable for hot water up to a working pressure of 24 bar (348 PSI) with an adjustable jet controlled by the trigger. Ergonomic construction, shockproof plastic, hand guard and an easily operated trigger are features that help making the washing operations less heavy. CEJN Washdown guns are available in brass or stainless steel for corrosive liquids. Fixed inlet or swivel inlet to simplify the washdown operations.

### The 209 Professional Air & Fluid Gun

- ✓ High performance with precise flow control
- ✓ High blowing force
- ✓ Available in classic blue or Hi-Vis colors
- ✓ Lightweight & ergonomic
- ✓ Durable design

### eSafe™

- ✓ Vented Safety Coupling
- ✓ Available in Stainless Steel for leak-free energy efficiency
- ✓ High flow - Low pressure drop
- ✓ Extreme durability

### Multi-Link System

- ✓ Versatile units save both time, space and energy
- ✓ Available in 1 to 5 outlets
- ✓ Powered by eSafe quick couplings
- ✓ Flexible design

### Compressed Air Hose Kits

**Streamline your hose operations with FDA approved PUR Hose Kits**

CEJN Stream-Line compressed air hose kits are ready-to-use kits that make it easy to acquire suitable hose and coupling combinations for pneumatic applications. No tools are required to set it up, and it does not require follow-up tightening. The kits are available in several pre-configured combinations of quick couplings with the CEJN Stream-Line polyurethane hose or the anti-static rubber hose. Some configurations include the eSafe Stream-Line couplings and nipples for reusable and leak-free hose connections and hi-vis hose for increased workplace safety.

### ultraFLOW Quick Couplings

- ✓ Spill-free for rinsing, washdown stations, pressurized liquids
- ✓ Unequaled low pressure drop
- ✓ Lightweight and compact design

### Non-drip Quick Couplings

- ✓ Non-drop for rinsing, washdown stations, pressurized liquids
- ✓ Designed for low-pressure fluid applications
- ✓ Designed for all types of fluids
